
Artificial Neural Networks Vehicular Pollution

artificial neural network based line source models for ... - artificial neural networks (anns) capable of capturing highly non-linear phenomena appear to be useful alternatives to deterministic and stochastic techniques (moseholm et al., 1996; nagendra and khare, 2002). **identification of structural damage in a vehicular bridge ...** - identification of structural damage in a vehicular bridge using artificial neural networks c. gonza'lez-pe'rez* and j. valde's-gonza'lez autonomous university of the state of me'xico, cerro de coatepec, s/n ciudad **artificial neural network approach for modelling nitrogen ...** - artificial neural networks (anns) are useful alternative techniques in modelling the complex vehicular exhaust emission (vee) dispersion phenomena. this paper describes a step-by-step procedure to model the nitrogen dioxide (no2) dispersion phenomena using the ann technique. **vehicular pollution modeling using artificial neural ...** - sharma et al: vehicular pollution modeling using artificial neural network technique 639 specific inputs and network is given a learning algorithm to follow and calculate new connection 'weights' that bring output closer to the target output. **a neural network based model for predicting acceleration ...** - 3. forward model using artificial neural network in this study, an artificial neural network based method called rf5 (rule extraction from facts version 5) was chosen to model the vehicle transformation, f. this was done because of the universal function approximation and other favorable characteristics offered by neural networks (muthiah, 2006). **the application of neural networks to fuel processors for ...** - the application of neural networks to fuel processors for fuel-cell vehicles laura c. iwan and robert f. stengel, fellow, ieee ... 126 ieee transactions on vehicular technology, vol. 50, no. 1, january 2001 ... utility and advantages of artificial neural networks over conventional methods in controlling complex thermal and **mukesh khare, s.m. shiva nagendra artificial neural ...** - artificial neural networks in vehicular pollution modelling. studies in computational intelligence, volume 41 ... artificial neural networks in st. augustine, trinidad & tobago at present: atlantic lng chair professor in environmental engineering university of west indies . **predicting traffic through artificial neural networks** - predicting traffic through artificial neural networks 1197 2 video streaming the video streaming is the transmission of digital media through a certain network, in the world of the internet is constantly seen as for example in youtube, **artificial neural network for traffic noise modelling** - artificial neural network for traffic noise modelling francis cirianni and giovanni leonardi ... has been developed to predict vehicular traffic noise in urban area. the proposed ann model has been used to predict the ... objective of this study is the development of an artificial neural networks (ann) approach to assess traffic noise. **gps/ins integration utilizing dynamic neural networks for ...** - gps/ins integration utilizing dynamic neural networks for vehicular navigation aboelmagd noureldina,c,*, ahmed el-shafieb, mohamed bayoumic a navinst - navigation and instrumentation research group, department of electrical and computer engineering, royal military college of canada, kingston, ontario, canada k7k7b4 **artificial neural network - day, use of artificial neural networks to model variation of noise levels from traffic around the campus area has been reported [7]. a comprehensive study on the assessment and ann modeling of noise levels due to vehicular traffic flow for uninterrupted and interrupted traffic flow condition in prediction of gas emission quantity using artificial ...** - prediction of gas emission quantity using artificial neural networks lixia lei 1, ... artificial neural networks (anns) are computational models inspired by animals' central nervous systems that are ... represented by nonlinear functions, **artificial neural network analysis is an artificial intelligence (ai) approach to modeling. neural network and time series analysis approaches in ...** - electricity consumption of public transportation vehicles . claudio guarnaccia, joseph quartieri, carmine tepedino ... one is based on artificial neural networks (ann) and the other on time series analysis (tsa) ... control the vehicular traffic due to private transportation. for this reason, electrical tram and ... increasing vehicular mobility using a backpropagation ... - neural network approach to increase the mobility of the cars in any particular junction. in this sense, the paper uses a ... vehicular mobility, neural networks. i. introduction nowadays, the modern cities are facing to a set of ... and simulation. however, software agents and artificial intelligence techniques in urban traffic systems have arisen
